## APPROACH

For middle market businesses in particular, the effects of market fluctuations can suddenly put even the very existence of what they have built, at risk.

RIW's Corporate Restructuring and Distressed Assets Team provides a range of legal services designed to preserve the value of distressed business assets and the relationships built around those assets. We work closely with our middle-market clients to identify the viable core of a business' assets and operations and to implement the legal strategies necessary to protect and preserve its value and limit exposure.

Our Team of seasoned restructuring attorneys, combined with the support of RIW's litigation and transactional practitioners, are highly-skilled in all areas of insolvency law to address our clients' needs in a cost-effective and efficient manner, including:
